

# *Competitive Events – Information*

## *What may you compete in?*

You may choose to compete in part or all of the following:

- One event of your choice from the posted list
- One event from the Health Science category
- One test from the National Geographic Learning category
- HOSA Bowl (team event)
- Anatomage Tournament (3-5 on team; limit 2 teams per school)
- Any Recognition events you participated in (can be more than one)

## *You must read below:*

- ✓ The posted list of events will remain the same for the coming years. Changes will be made only per HOSA updates. This list will remain on the website year-round; you will always be able to look to see what events are offered.
- ✓ You will not be able to request an event be added for this year, no matter how many request it.
- ✓ If you wish to make a request for future years, you may do so [here](#). All suggestions will be considered and discussed by the Competitive Events (CE) Team for the following year.

## *Things to Know!*

- **Testing:** All tests will be taken online before the conference.
- Notes/books may be used during online testing for MOST tests.
- Notes/books may not be used for Medical Spelling and Medical Terminology.
- During testing, there is not to be talking – no asking the teacher/proctor nor anyone for an answer. If you don't know an answer, make an educated guess.
- No cell phones may be used. See Cell Phone policy [here](#).
- **Looking up answers takes up valuable time!** Be organized, have notes for what you think you will really need.
- You will not be given extra time due to having to look up in notes or books.
- Always answer the tie-breaker if there is one at the end of the test. This could mean the difference between winning or not winning.
- **Study! Study! Study!** Start way ahead of time, not just a week or couple days before.
- Some events need to be done way in advance and planned out. Before you do anything, read your whole event guideline.
